

Blind Cords Compatibility

The Brunt Blind Engine comes with two different gears include Cord for normal string cords/small ball chains and Chains for Large ball. Those two gears are designed accommodate most type of blinds.

Cord & Small Beads Gear

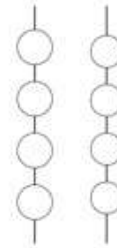

1.3mm - 4.7mm

Large Beads Gear

6mm - 6.6mm

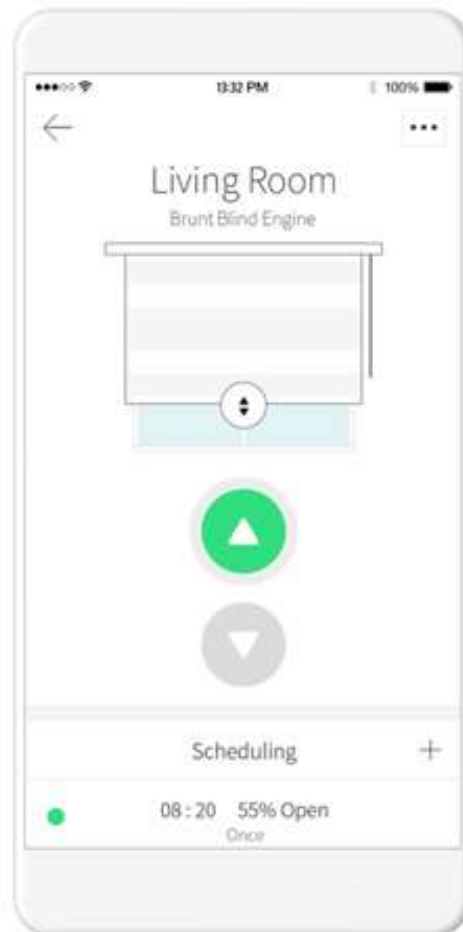

Mobile Control

Remote-Controllable

UI of Brunt App is intuitively designed so anyone can easily handle it, even they are not familiar with IT device.

You can set the maximum and minimum of blinds length so you can raise and lower your blinds until whatever you set. also whether you're inside, outside, or even traveling abroad, you can raise and lower your blinds anytime and anywhere.

Installable location

Brunt blind engine Fit to window frame, also on the wall.

Location Awareness Control

Automation Depending on Your Location

The Brunt Blind Engine also allows for convenient auto-run capabilities depending on your current geographic location. Brunt Blind Engines registered in the Welcome & Goodbye action can automatically move your blinds when you arrive or leave home. (Your location and blind settings can be adjusted to fit your preferences.)

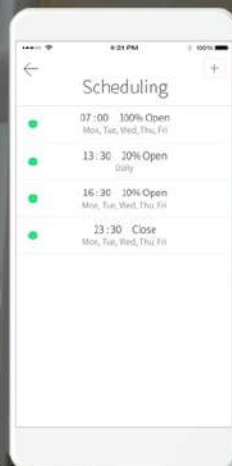

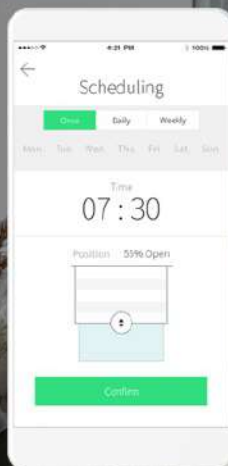

Scheduling

Customize your Lifestyle with Auto-Light Control

Protect from strong sunlight during the day, and guard your privacy at night. The Brunt Blind Engine's timer function allows you to set your desired blind heights in advance, and then executes them when scheduled.

Create a more relaxed lifestyle by utilizing smart light controls set to match your day-to-day activities.

Morning: 7 am

Wake up to the refreshing morning sun!

Afternoon: 1:30 pm - 3:30 pm

Allow your baby to nap comfortably during the day!

Afternoon: 4:30 pm - 7:30 pm

Go out without worrying about leaving a visibly empty house!

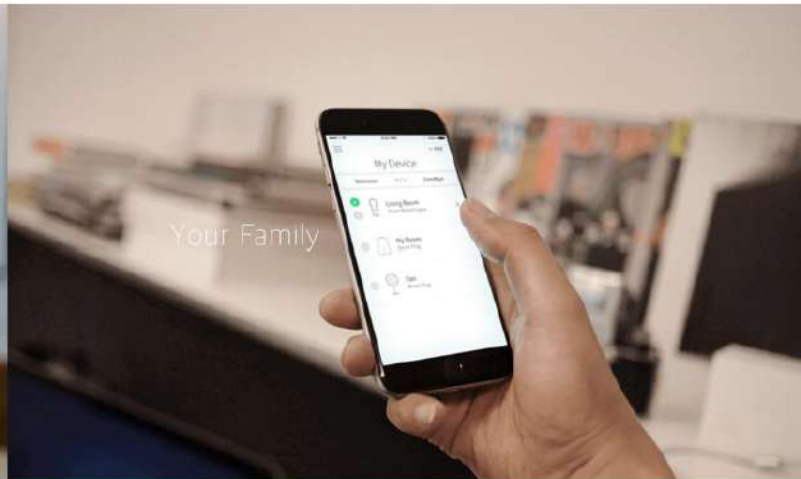

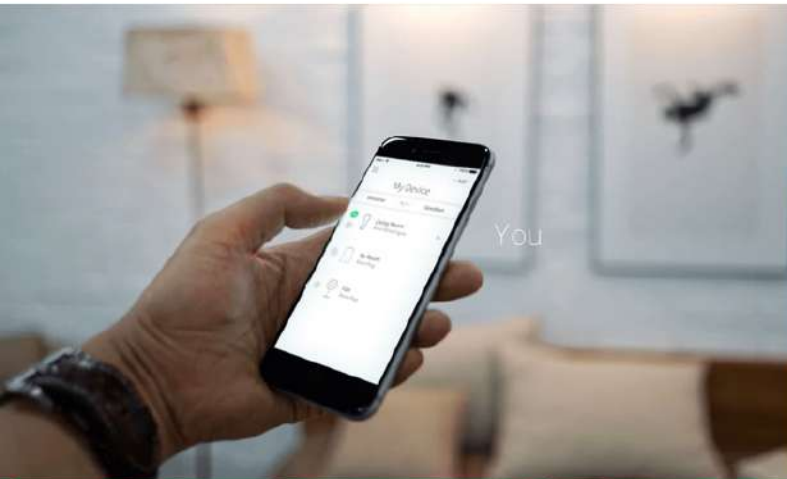

Evening: 11:30 pm

Time to sleep! Lower the curtain!

Share Permission

Share Control with Family and Friends!

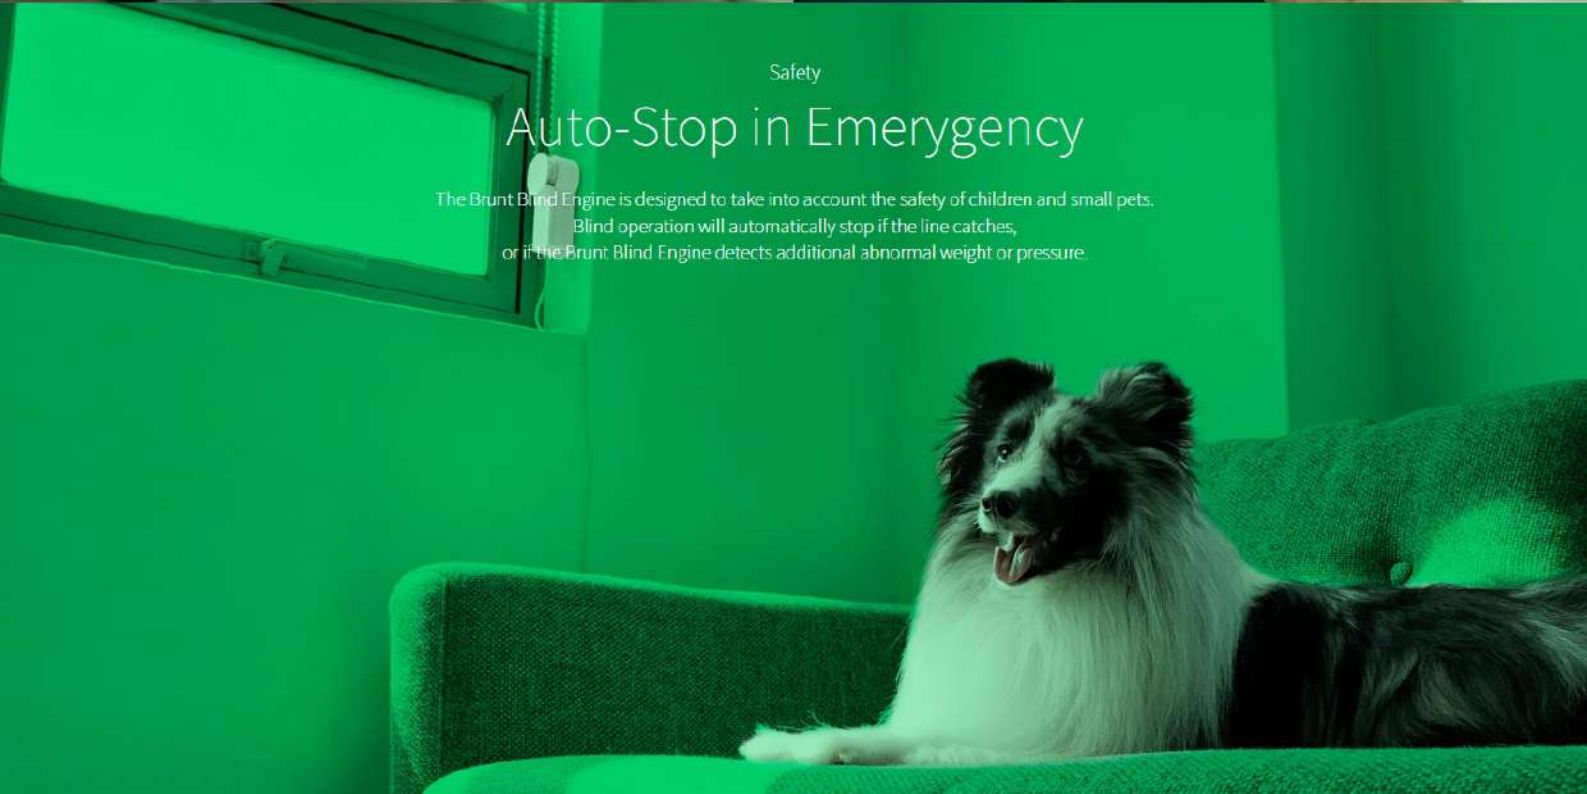

The Brunt App's Share Permission feature easily lets you extend control of your devices to others sharing your living space.

Safety

Auto-Stop in Emergency

The Brunt Blind Engine is designed to take into account the safety of children and small pets. Blind operation will automatically stop if the line catches, or if the Brunt Blind Engine detects additional abnormal weight or pressure.

Voice Control

Order Using Your Voice

Use Brunt Blind Engine with your own voice.
You can control Brunt Blind Engine by various voice recognition speakers.
You can feel a different lifestyle experience.

Simultaneous Control

Welcome & Goodbye. Action

Even if you use multiple blinds in your home, they can all be easily and simultaneously controlled. With the Brunt App's Welcome & Goodbye feature, you can raise and lower multiple blinds at the same time. This action can also be used to simultaneously control all other devices registered in the Brunt App, such as the Brunt Plug and the Brunt Powerstation.
