"What's visible are seamless
What's invisible is strength"

Our Vision

To build trust by establishing a long-term relationship with all of our customers.

Our Mission

To provide safety and security to residential and commercial constructions through our products and services with outstanding benefit.

Our Mission

To provide quality and safe products with solutions.

VISION

MISSION

VALUES

The cable is heart of our product which is made using 316 marine grade stainless steel that comes with premier nylon melt coat. This product can either be fixed to the building structure or it can also be fixed to customized aluminum frames in both vertical and horizontal form.

Invisible Grilles are capable of supporting a tensile impact up to 400 kg which helps to keep your family safe and secure inside the premises.

It is a sleek cable of 2mm diameter, safeguarding children and pets without compromising on your view.

It is an ultimate solution which will provide safety and aesthetics.

WHAT ARE INVISIBLE GRILLES?

FEATURES OF INVISIBLE GRILLES

STIFFENERS

RIVETS

FASTENERS

Every window or balcony will have an alarm integrated which will work only for that respective fixture.

ALARM

Alarm will be fixed on the walls close to the grilles.

CABLE

Wires of the alarm are connected to two ends of the cable.

SOUND

Once disconnected the sound resonates loudly until switched off.

ALARM SYSTEM

INSTALLATION IN BALCONY

Balcony is the space in any residence where maximum amount of fun activities happen.

As kids, pets and elderly are the group who have major chances of risk or accidents in this area, providing them a protecting barrier is very important.

Invisible grilles is the best solution for such issues, where people can stay assured without any worries.

They provide both safety and a classy look.

TYPES OF BALCONY INSTALLATIONS

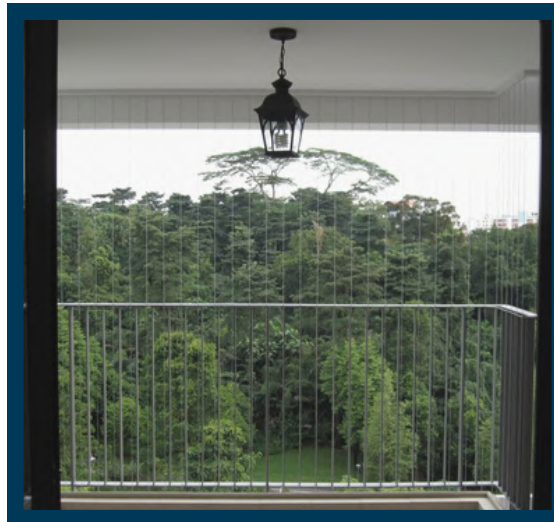

L - SHAPE BALCONY

STRAIGHT BALCONY

C - SHAPE BALCONY

U - SHAPE BALCONY

INSTALLATION IN WINDOW

Windows are the most important openings in a built structure as they allow natural light and ventilation inside the building keeping it fresh.

People feel restricted to open the windows these days due to multiple reasons and mostly pigeons.

Similarly applying MS Grilles will obstruct the view as well as disrupt the look of the structure.

For all such problems invisible grilles is the best option.

TYPES OF WINDOW INSTALLATIONS

SLIDING WINDOW

CASEMENT WINDOW

FIXED WINDOW

BI - FOLD WINDOW

INSTALLATION IN STAIRCASE

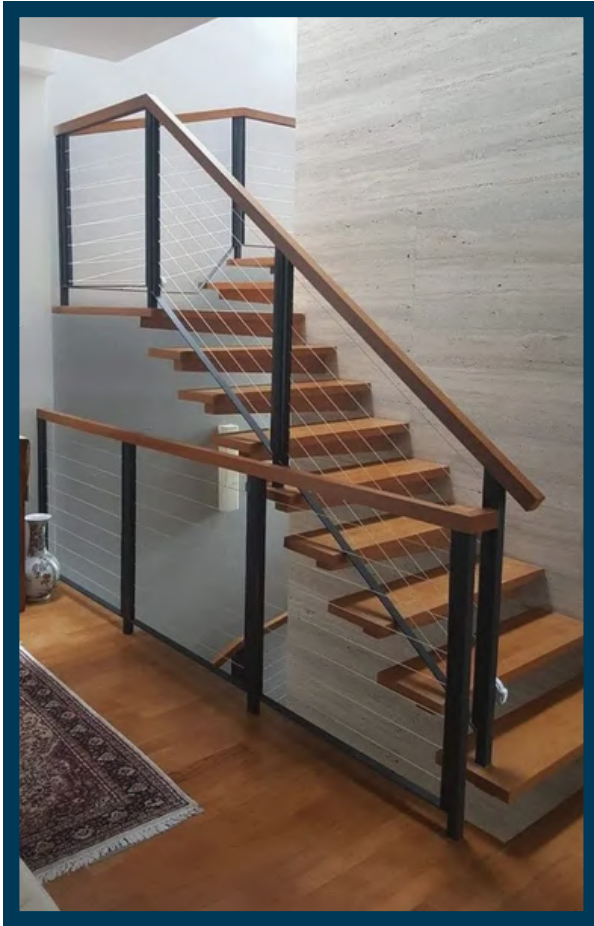

Staircase rail gives support to any person walking upstairs or downstairs.

The advantage of invisible grilles is space efficiency where stainless steel cable provides safety and makes the place visually appealing.

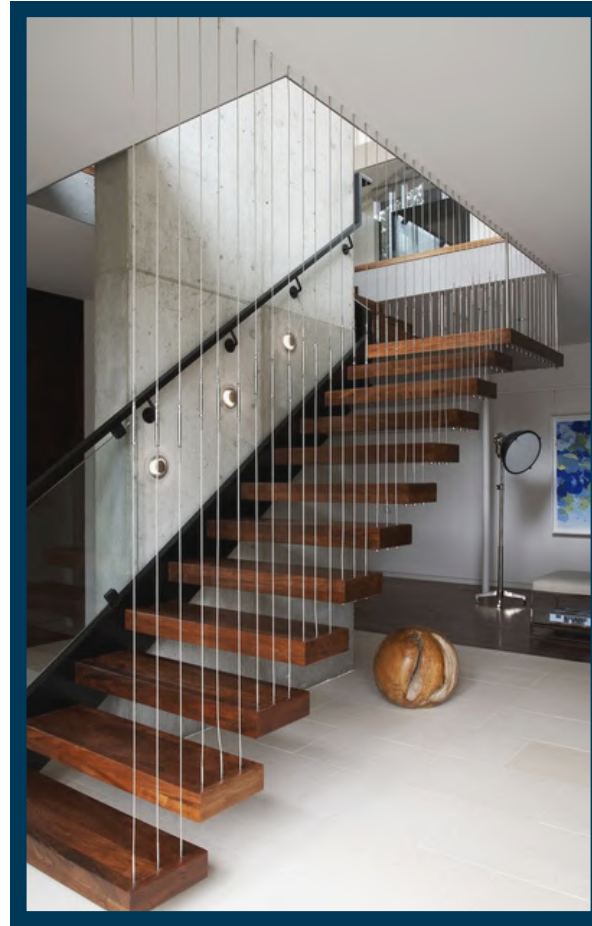

TYPES OF STAIRCASE INSTALLATIONS

HORIZONTAL INSTALLATION

VERTICAL INSTALLATION

INSTALLATION IN RAILING & PARTITION

Railing is an installation similar to staircase installation. But, invisible grilles are preferably necessary when it comes to the terrace area or staircase landing region.

There are situations when people bend down from terrace to view the site and, to avoid any unfortunate situation invisible grille is the best option.

Invisible grilles can also be used as partition between two spaces, irrespective of which people are visually connected.

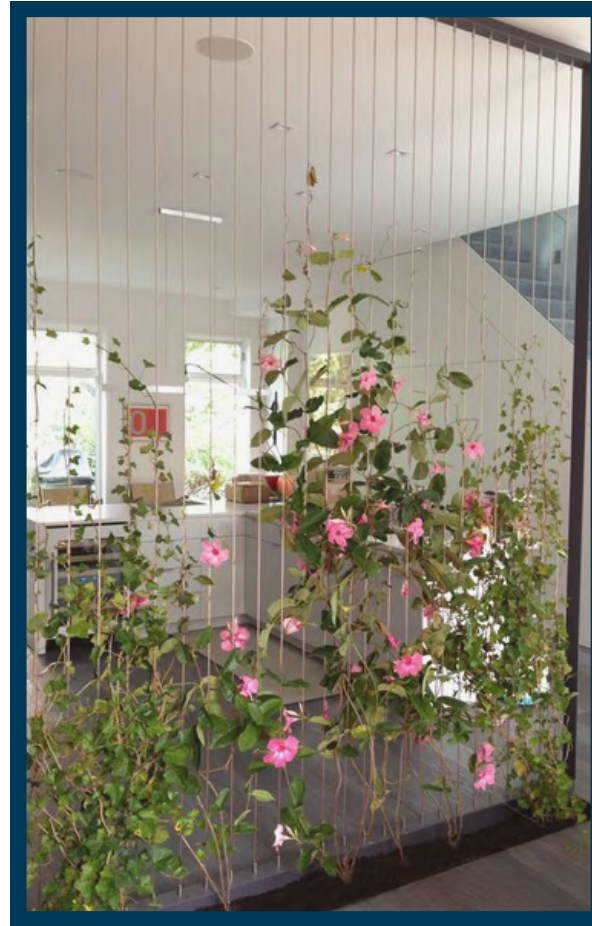

TYPES OF RAILING INSTALLATIONS

Built in Alarm		

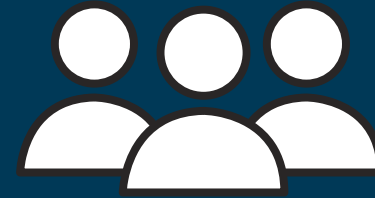

Our installation team is trained in Singapore and is well experienced.

They have been on field and have been installing grilles from the past 9 years.

They are capable of identifying where to and how to install the products irrespective of any challenges.

As we are in association with Hilti, our team uses only Hilti power tools and accessories to install grilles.
